

**Vinegar or oil bottles**

These bottles are not made of PET and they may damage recycling, mainly because of vinegar or oil residue.

**Dirty paper and cardboard**

If clean, all paper and cardboard boxes can be recycled together.

**Plastic containers**

Objects made of plastic and other materials, and those soiled by food, must be thrown in the plastic bags.

**Fruit juice or milk cartons**

This type of wrapping is not only made of cardboard but also layers of plastic, wax and aluminium. Consequently, these cartons must not be thrown out with paper.

**Vacuum cleaner bags**

**Compound waste**

When various materials are tightly mixed to constitute an object, it is called "compound waste". That mix can currently not be recycled.

**Dirty cloths and old trainers**

All textile, clothes and shoes in good condition, can be deposited in clothes banks. However, if they are dirty (grease, paint, etc.), they belong in the plastic bags.
